### Maintenance Program

Wyld Creek Inc. will visit your water feature twice a month (bi-weekly). Any additional service we will have to price quote.

1. Review the overall condition of the water feature (pumps, bio-falls, etc).
2. Check for burnt out light bulbs, replace as needed (material charge).
3. Add beneficial bacteria monthly.
4. Add algaecide monthly.
5. Thoroughly rinse all filter pads.
6. Rinse bacteria media as needed.
7. Thoroughly rinse skimmer baskets.
8. Recover all exposed pond liner with existing gravel.
9. Check for shifted rocks.
10. Remove over growth of plant material from areas that restrict adequate water flow (in the bio-fall, skimmer, zero edge, bogs, & streams).
11. Remove string algae from stream, pond, & waterfall.
12. Add water to pond if needed.

Cost: (Bi-weekly visit = 2 X a month)
